

SERVICES & SOLUTIONS · THE COMPLETE PICTURE

Three ways into *the corridor*.

synARKa Intelligence is the Indo-Pacific Sovereign Sense Engine — multi-engine consensus across critical minerals, rare earths, geopolitics, defence, logistics, infrastructure and markets, delivered **72 hours before it becomes the headline**. This document collects every way to work together in one place: the entry ladder, the eight standing protocols, and the public resolved ledger that anchors all of it. *Insight, not prediction. Misses published as openly as hits.*

INSIDE · THREE SECTIONS

I

THE ENTRY LADDER · RISK ON THE OPERATOR

Brief → Audit → SiteWatch → Retainer

One A\$500 question opens the door. A Site Baseline Audit reads one named asset. SiteWatch keeps continuous watch. Each rung credits forward — nothing wasted.

From A\$500

72-HOUR TURNAROUND

II

STANDING PROTOCOLS · EIGHT PATHWAYS

Free public ledger to Sovereign-grade engagement

Eight tiers from A\$0 to case-by-case consultancy. All subscriptions month-to-month, no lock-in. Audits and consultancy stand alone or run alongside any tier.

A\$0 → POA

MONTH-TO-MONTH

III

THE LEDGER · PROOF BEFORE PITCH

Read the receipts at insights.synarka.pro

Every insight timestamped, calibrated 25%–88%, resolution-dated, and resolved in public. May 2026: **5 of 6 published insights resolved correct** — the one miss reported in full.

5 / 6

RESOLVED CORRECT

Every engagement starts with *receipts, not promises*.

Founder-direct, every call · prices AUD, GST where applicable · ABN 83 988 690 362 · Sydney, Australia

THE DIAGNOSTIC · WHAT THE CORRIDOR COSTS THE UNWATCHED

An honest brief on Indo-Pacific intelligence — *what it is, what it isn't.*

Five minutes' reading. The same information published at synarka.pro. No essay quotes, no big claims — every number below is sourced and checkable. The discipline of this platform is simple: **"insight", never "prediction"**; calibrated confidence, never rounded up; misses published as openly as hits.

THE 6-QUESTION INTELLIGENCE-GAP CHECK

Two minutes. If you can answer all six comfortably, synARKa will tell you that you don't need us. *No commitment, no follow-up, no drip sequence.*

- Q1.** Did your team see the last corridor-moving event — offtake, export control, chokepoint disruption — **before** it hit mainstream wires?
- Q2.** Do you know, today, which **single chokepoint failure** would hit your supply chain or portfolio hardest?
- Q3.** When a signal breaks at 2am AEST, does anything in your pipeline **triage it before the morning wires** do?
- Q4.** Can you **audit the track record** of your current intelligence source — published calls, resolution dates, misses included?
- Q5.** Do you have **satellite-side visibility** on the physical assets you depend on — your sites, your suppliers' sites, your routes?
- Q6.** If your board asked **"what's our 72-hour Indo-Pacific exposure right now,"** could you answer with sources?

Honest promise. If your answers show you're already covered — in-house analysts, satellite feeds, audited sources — synARKa will say so and won't engage. No upsell, no pressure. The honest "you're fine" is genuinely on the table.

Why this brief is fair. The Sovereign Sense satellite pipeline (continuous ingestion, change detection, automated alert routing, SHA-256 hashing, OpenTimestamps anchoring) is **v1.0 in active build** — not a fully-deployed live service today. Historical baseline audits on individual sites are available now; full continuous monitoring at enterprise scale activates with the first three paying audit engagements. The Geelong reference is a **methodology illustration**, not a published synARKa insight. In Australia, "prediction markets" are classified as unlawful gambling by the ACMA — synARKa publishes calibrated **insights**, never betting products.

THE METHOD · FOUR STAGES · ONE LEDGER

SENSE → **SIMULATE** → **VERIFY** → **DELIVER.**

Agnostic by design — every component swappable as better tools arrive. The architecture is the moat, not any single model or sensor.

STAGE	WHAT HAPPENS	STATUS
01 SENSE	Continuous multi-source signal ingest — research queries, satellite aggregators, maritime & regulatory feeds, social listeners. No human latency, no editorial filter.	OPERATING TODAY
02 SIMULATE	Convergence synthesis across 8 reasoning engines on structured prompts; median adopted where 6+ cluster, dissent flagged honestly. Psychometric agent swarms: Phase 2, in active build.	8-ENGINE CONSENSUS LIVE · SWARMS PHASE 2
03 VERIFY	Every output cross-checked against primary sources before release; falsification triggers written into each insight. SHA-256 + OpenTimestamps + Brier scoring: Phase 2, in active build.	LOGGED · RESOLUTION-DATED · CRYPTO PHASE 2
04 DELIVER	Timestamped, calibrated brief to the decision-maker — Telegram signal, PDF brief, public ledger — before the headline, not after it.	OPERATING TODAY

THE ENTRY LADDER · INCL. WHERE EACH RUNG LEADS

RUNG	WHAT YOU GET	PRICE
01 · 72-Hour Brief	One corridor question — a mineral, a route, a policy shift, a counterparty. Multi-engine consensus read, sourced and calibrated, in your inbox inside 72 hours.	A\$500 ONE QUESTION
02 · Site Baseline Audit	One named asset — refinery, port, mine, corridor segment. Archive satellite baseline + structural risk read + the geopolitical context layer no pixel vendor carries. Credits toward SiteWatch.	A\$3,500–7,500 ONE-TIME
03 · SiteWatch ★	Continuous monitoring on your audited asset — monthly change-detection brief + alert trigger. Tasking brokered across commercial constellations, pay-per-pass, NDA-tier providers. Activates from your Baseline Audit as the v1.0 pipeline scales.	from A\$1,490 /MO PER SITE
04 · Sovereign Retainer	Full-engine engagement — multi-site, multi-domain, board-level cadence. Choose from the eight standing protocols below.	Tiered SEE PROTOCOLS

THE EIGHT STANDING PROTOCOLS · MONTH-TO-MONTH, NO LOCK-IN

FREE · PUBLIC A\$0 Public ledger · weekly digest · live widgets	WATCH · TEST A\$99/mo 1 domain · weekly brief · Telegram channel	OPERATOR A\$1,500/mo All 8 domains · weekly + 48hr alerts	PRO ★ A\$5,000/mo Daily dispatches · founder direct line · 24h SLA
ENTERPRISE A\$15K+/mo Multi-desk · custom watch parameters	TAILORED · SOVEREIGN POA Government & prime-grade scoping	AUDIT · ONE-TIME A\$5–15K Intelligence-pipeline / dark-data audit	CONSULTANCY Case-by-case Corridor advisory · scoped in 24–48h

Run-note. Satellite tasking passes are brokered pay-per-pass and scoped per asset inside SiteWatch — synARKa operates no satellites and never claims to. Subscriptions are month-to-month; audits and briefs stand alone. Prices AUD; GST where applicable.

THE FOUNDER · DIRECT TO RAJ, EVERY ENGAGEMENT

"Satellite data is cheap. Frontier reasoning models are cheap. Raw intelligence is cheap. The last mile of context — translating commodity pixels into 'Zone B compressor is failing' — that is the moat. And it cannot be bought."

RAJ SINGH · FOUNDER SYNARKA INTELLIGENCE · 25 YRS INDO-PACIFIC CORRIDOR · AUSTRALIAN ENTITY ACTIVE SINCE 2003 · 94K+ ORGANIC VIEWS, R/ENERGY #1 · SYDNEY · SOLO, AI-AUGMENTED · FOUNDER-DIRECT, EVERY TIER

THE MOAT · WHY SYNARKA, WHY NOW

↳ 01 · THE RESOLVED LEDGER

Misses published, equal weight

Every insight timestamped, calibrated 25%–88%, resolution-dated. May 2026: 5 of 6 correct; the Hormuz miss reported in full. A ledger that hides its misses is not a ledger.

↳ 02 · INDO-PACIFIC STRUCTURAL IDENTITY

Australian, in the corridor, already operating

Palantir is American. SFA Oxford is British. Stratfor is American. Nobody else in this space is Australian, Indo-Pacific facing, and live.

↳ 03 · MULTI-ENGINE CONSENSUS

Eight reasoning engines, one synthesis

Structured prompts across 8 frontier engines; median where 6+ cluster, dissent flagged. The orchestration — prompt library, corridor topology, synthesis judgement — cannot be forked.

↳ 04 · THE SATELLITE LAYER

Brokered, NDA-tier, honest

SAR + thermal tasking brokered pay-per-pass across commercial constellations — physical-world signal no model update can replicate, with the consensus layer on top.

NEXT STEP · FOUR WAYS TO START

01 · EMAIL RAJ

Send one corridor question

Three lines is enough. Reply within 24–48 hours, direct from the founder.

04 · READ THE RECEIPTS

The resolved ledger

Every published insight, resolution-dated — misses included.

insights.synarka.pro

Honesty callout. The resolved ledger is the only marketing synARKa runs. Phase 2 capabilities (automated SHA-256 hashing, OpenTimestamps anchoring, Brier scoring, psychometric agent swarms, sub-12hr SLAs) are flagged in-build and never sold as live. Worked dollar examples on the ledger use verified market prices on stated dates and are not trade recommendations.

Disclaimer. synARKa Intelligence publishes research and educational content only — not financial product advice, legal advice, or investment recommendations. synARKa is not an AFS licensee; nothing here considers your objectives, financial situation or needs. Calibrated confidence figures are structured probability synthesis across multiple reasoning engines — not predictions, not betting odds. Past resolution results are not a reliable indicator of future accuracy. Seek independent AFSL-licensed advice before any financial decision.
